

Transition of Care Program and Medication Reconciliation Post Discharge (TRC)

Clinically Customized Remote Care

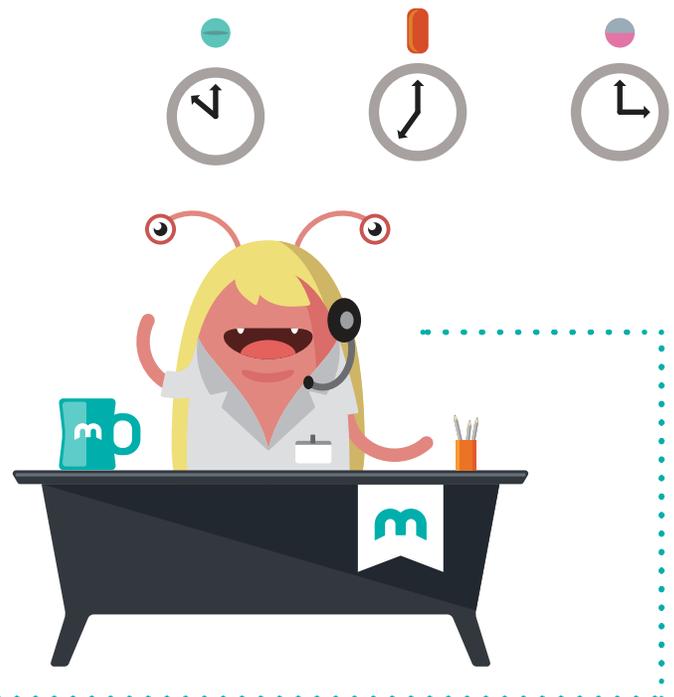

Let our pharmacists be your telehealth support team.

What to Know about the TRC Measure

- The percentage of discharges for patients 18 years of age or older, as of December 31 of the measurement year, who had an acute or non-acute inpatient discharge on or between January 1 and December 1 of the measurement year, who had each of the following:
 - Notification of inpatient admission
 - Receipt of discharge information
 - Patient engagement after inpatient discharge
 - Medication reconciliation post-discharge
- As a follow up, medication reconciliation documentation is sent to the primary care doctor's office along with clinical recommendations if appropriate
- All work is done up to standards of CMS and other accrediting agencies.
- Our credentialed TOC pharmacists will complete all reviews and counseling ensuring that the patient is not experiencing any clinical issues post discharge.
- As of 2022, CMS requires that Medicare Advantage plans report on the full Healthcare Effectiveness Data and Information Set (HEDIS®) Transitions of Care (TRC) measure. This measure will play a part in calculating 2024 Medicare Advantage star ratings

myMTMcare can be your partner for the provision of CMRs in a transition of care or provide medication reconciliation post discharge.

A typical program works closely with your team to identify eligible patients, obtain discharge information, provide a CMR and/or medication reconciliation within the 30-day time frame, provide appropriate documents to the primary care providers within the designated timelines, and follow up to ensure the most accurate recording of all required documentation.
